

## XTC7088H

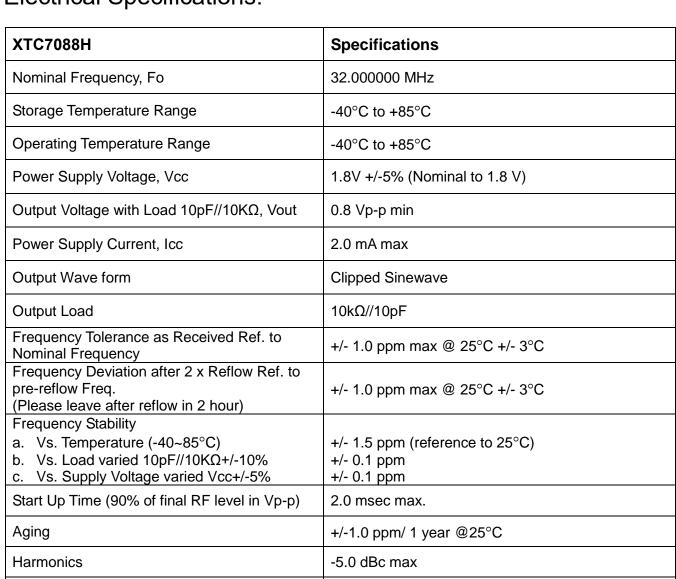

#### Features:

- Ultra Miniature SMD Package
- Good Frequency Stability
- Good Phase Noise Response
- Moisture Sensitivity Level (MSL): Level-1
- Hermetically sealed

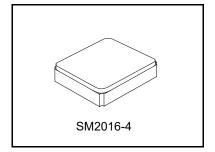

## **Description and Applications:**

Surface mount 2.0mmx1.6mm TCXO for use in wireless communications devices

## **Electrical Specifications:**

## 32.000000 MHz TCXO

SSB Phase Noise

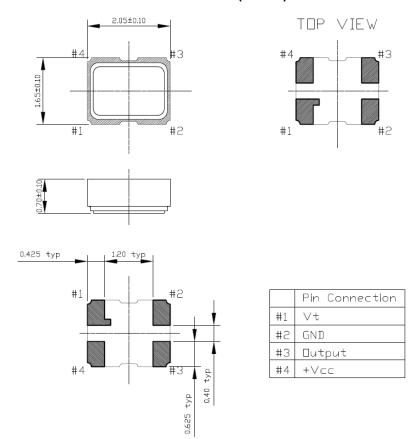

Marking

-130 dBc/Hz max

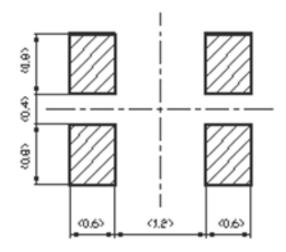

Laser marking

(@1KHz Carrier Offset)

# Mechanical Dimensions (mm):

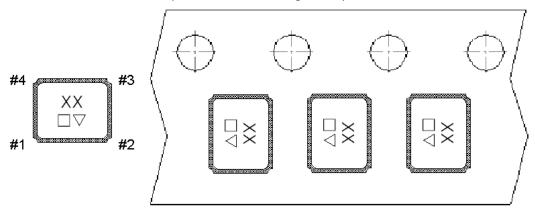

# Recommended Land Pattern: (unit: mm)

# Marking:

Line 1: Frequency XX (32)

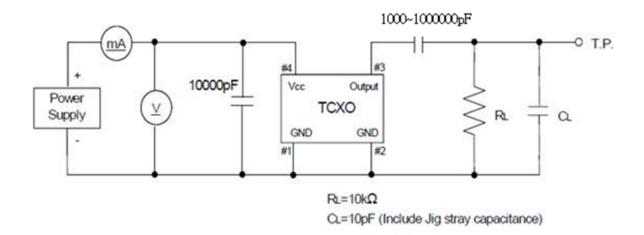

Line 2: Product Code :  $\Box$  ( $\Box$  internal tracking code) +Date Code of Year/Month :  $\nabla$ 

#### abla: Date Code Table: Year/Month

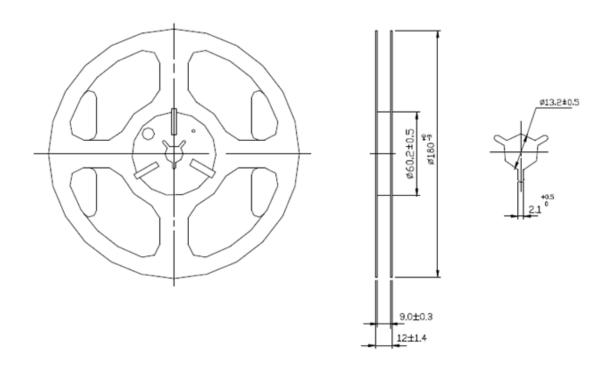

Year/Month	1	2	3	4	5	6	7	8	9	10	11	12
2022	Α	В	С	D	Е	F	G	Н	J	K	L	М
2023	N	Р	Q	R	S	Т	U	V	W	Х	Υ	Z
2024	а	b	С	d	е	f	g	h	i	j	k	m
2025	n	р	q	r	s	t	u	٧	w	х	у	Z
2026	Α	В	С	D	Е	F	G	Н	J	K	L	М
2027	N	Р	Q	R	S	Т	U	V	W	Х	Υ	Z
2028	а	b	С	d	е	f	g	h	i	j	k	m
2029	n	р	q	r	s	t	u	٧	w	х	у	Z
2030	Α	В	С	D	Е	F	G	Н	J	K	L	М
2031	N	Р	Q	R	S	Т	U	V	W	Х	Υ	Z
2032	а	b	С	d	е	f	g	h	i	j	k	m
2033	n	р	q	r	S	t	u	٧	w	х	у	Z

## **Recommended Circuit**

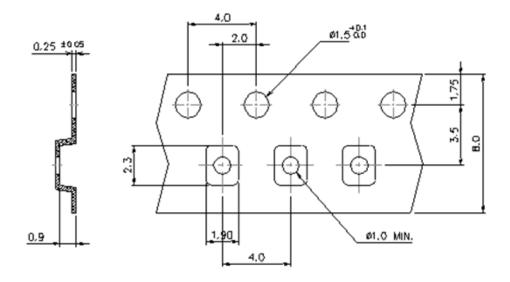

## **Reel Dimension**

Reel Count: 7" = 3000

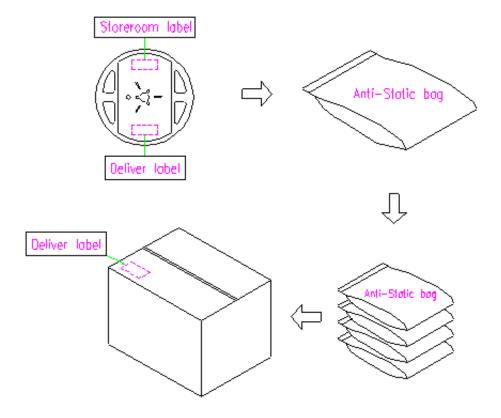

# Tape Dimensions (mm)

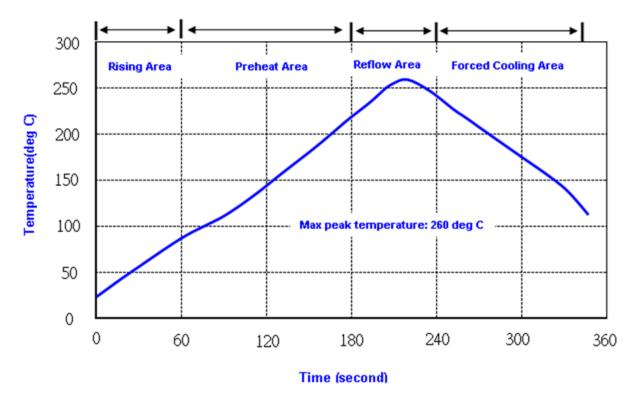

# Packing Quantity/Packing:

#### 3K pcs maximum per reel

#### Reflow Profile:

### Notes of the Usage:

- 1. Touch the solder iron at 260+/-5 deg C onto the leads for 10+/-2 sec max or touch the solder at 350+/-5 deg C onto the leads for 3+/-0.5 sec.
- 2. In the customer's reflow process, if it will remain some mechanical stress at the soldering terminals, also make some cracks on the soldering termination. Some cracks will cause open or short circuit and cause of thermal increasing or smoking. Don't make any excess mechanical stress to soldering points.
- 3. In case of giving a heavy shock to the products, it may make an open or short circuit and cause of thermal increasing and smoking. To avoid heavy shock impact applying to products is strictly required.
- 4. Ultrasonic cleaning should be avoided to prevent damage to the TCXO.
- 5. Do Not Use Ultrasonic-Wave Soldering or Wave Solder with Package Immersed in Solder.
- 6. Do not lay out the ground (GND) pattern under crystal unit, this will add parasitic capacitance.
- 7. Do not run Digital / RF signal lines, power, or ground under oscillators for multi-layered

### **Notes of the Storage:**

- 1. To keep products under the condition at the room temperature (-5~35 deg C) with normal humidity (45~75%). Absorption of moisture and dewdrop may make inferiority of characteristics and a short circuit.
- 2. Oxidization of terminals shall make the solderability more inferior. Dusts and corrosive gas will make a cause of the open or short circuit. Keep it in the clean place where is not in dusty and no corrosive gas.
- 3. Use the unti-static material to the storage package.
- 4. Don't put any excess weight to the TCXO in the storage process.
- 5. Don't move the product from the cold place to the hot place in the short time, otherwise it may make some dew-drop, then a short circuit may happen in case.
- 6. Storage periods should be maximum 6 months under condition of above item 1 after delivery from the factory.
- 7. Once open the bag, there is possibility of electrical characteristics deterioration due to absorption of moisture. So, please use parts within 7 days after opening the bag.
- 8. If you have to keep parts without using after opening the bag, please put the drying agent in the bag, fold the bag and keep it in the place where temperature and humidity are controlled (nitrogen atmosphere box etc.)

CAUTION: Electrostatic Sensitive Device. Observe precautions for handling.

- 1. The design, manufacturing process, and specifications of this device are subject to change.
- The design, manufacturing process, and specifical
   US or International patents may apply.
   RoHS compliant from the first date of manufacture.

**Reliability Specifications** 

Test name	Test process / method	Reference standard							
Mechanical characteristics									
resistance to Soldering heat (IR reflow)	Temp./ Duration: 265°C /10sec x2 times Total time: 4min.(IR-reflow)	-300(301)M(II)							
Vibration	Total peak amplitude : 1.5mm  Vibration frequency : 10 to 2000 Hz  Sweep period : 20 minute  Vibration directions : 3 mutually perpendicular  Duration : 2 hr / direc.	MIL-STD 202G method 204							
Mechanical Shock	directions: 3 impacts per axis Acceleration: 3000g's, +20/-0 % Duration: 0.3 ms (total 18 shocks) Waveform: Half-sine	MIL-STD 202G method 213							
Solderability	Solder Temperature:265±5°C  Duration time: 5±0.5 seconds.	J-STD-002							
Environmental characteristics									
Thermal Shock	Heat cycle conditions -40 $^{\circ}$ C (30min) $\longleftrightarrow$ 85 $^{\circ}$ C (30min) $^{*}$ ycle time : 10 times	MIL-STD 883G method 1010.8							
Humidity test	Temperature: 85 ± 2 °C Relative humidity: 85% Duration: 96 hours	MIL-STD 202G method 103							
Dry heat ( Aging test )	Temperature : 125 ± 2 °C  Duration : 168 hours	MIL-STD 202G method 108A							
Cold resistance (Low Temp Storage)	Temperature : -40 ± 2 °C Duration : 96 hours	IEC 60068-2-1
